

Spring has sprung

Time to Clean!

Many of us welcome spring by taking on the task of deep cleaning our homes. For commercial buildings, it's just as important, not only to prepare for warmer weather, but also to protect your investment. Now is the perfect time to enhance the appearance of your facility and be proactive in your maintenance.

HVAC: Have your cooling system inspected to be prepared for the warmer weather that is coming soon!

ROOFS: Inspect for any damage done over the winter and early spring storms. Ensure that your drains and gutters are free from clogs and in good working condition.

LANDSCAPING: Some easy ways to ensure your curb appeal: lay a fresh layer of mulch, treat lawns, trim bushes, replace any dead trees or shrubs, and plant new flowers.

WINDOWS: Clean windows will not only let in more natural light, but refreshes the exterior of your building after long winter months.

DEEP CLEAN: Bathrooms, high-touch areas, and carpets.

PEST MANAGEMENT: Be proactive with your pest management to prevent any unwelcome guests.

PARKING LOTS: Inspect catch basins/drains for clogs.

PREPARE FOR WET WEATHER: Be prepared to protect your flooring- put down heavy duty rugs in the entryways and don't forget to keep you wet floor signs handy!

Please contact us should you need assistance with any of your building repairs and maintenance
